INDEX TO VOL. I.

Actinomycosis, mycelial and other micro-organisms associated with human, 197
Adipose tissue, glandular, its relation to other endocrine organs, and to the vitamine problem, 184
Aërobic non-gas-forming bacteria, simple method of recording automatically the oxygen absorbed by, 66
Agglutinability of bacteria, variation in, associated with variation of cultural characters, 213
Anæsthesia, effect of surgical, on the reaction of the blood, 282
Antigenic properties of *B. psittacosis*, 131
Antigens, value of simultaneous testing for the Wassermann reaction with two different, 219

B. influenzæ, new medium for the growth of, 129
B. psittacosis, antigenic properties of, 131
Bacteria, aërobic non-gas-forming, simple method of recording automatically the oxygen absorbed by, 66
—— capsules of, technique for the demonstration of, 127
—— gas produced by, in culture, simple method of recording automatically, 66
—— influence of the reaction of media and the presence of buffer salts on the metabolism of, 288
—— variation in agglutinability of, associated with variation of cultural characters, 213
Bacteriological culture media, determination of the reaction of, 9
BAKER, S. L., technique for the demonstration of the capsules of bacteria, 127
BAYLISS, W. M., is hæmolysed blood toxic? 1
Bean, soy-, method for the estimation of urea by, 135
Benzidine peroxidase reaction, variations in the, 225
Blood, hæmolysed, toxicity of, 1
—— reaction of, effect of surgical anæsthesia on, 282
Blood, volume of, value of the vital-red method as a clinical means for the estimation of, 142
Buffer salts, influence of, on the metabolism of bacteria, 288

Cancerous and normal surviving mouse tissues, respiratory exchange of, 244
—— cells, comparative oxygen avidity of normal and, measured by their reducing powers on methylene-blue, 115
—— mouse tissues, oxygen consumption of normal and, *in vitro*, 175
Capsules of bacteria, technique for the demonstration of, 127
Classification, serological, of meningococci, 44
CLEMENGER, F. J., see *Fleming, A.*
COLEBROOK, L., the mycelial and other micro-organisms associated with human actinomycosis, 197
COLLIP, J. B., the effect of surgical anæsthesia on the reaction of the blood, 282
Colloidal gold test, value and mechanism of, 71
COWAN, MARY L., see *Maitland, H. B.*
CRAMER, W., on glandular adipose tissue and its relation to other endocrine organs and to the vitamine problem, 184
—— on sympathetic fever and hyperpyrexial heat-stroke, 31
CRUICKSHANK, J., the value and mechanism of the colloidal gold test, 71
Cultural characters, variation in agglutinability of bacteria associated with variation of, 213
Culture, gas produced by bacteria in, simple method of recording automatically, 66
—— media, see *Media.*

DALE, H. H., conditions which are conducive to the production of shock by histamine, 103
DETWEILER, H. K., see *Maitland, H. B.*
DREW, A. H., the comparative oxygen avidity of normal and malignant cells measured by their reducing powers on methylene-blue, 115
Dysentery, researches on, 237

Encephalitis lethargica, experimental transmission of, in series in monkeys and rabbits, 257
——— ——— to a monkey, 89
——— spontaneous infection in a monkey, 257
Endocrine organs, their relation to glandular adipose tissue, 184
Epidemic influenza, see *Influenza*.

Fever, sympathetic, and hyperpyrexial heat-stroke, 31
FILDES, P., a new medium for the growth of *B. influenzæ*, 129
——— the serological classification of meningococci, 44
——— and MCINTOSH, J., the ætiology of influenza, 119, 159
Filter-passing virus, experiments in search of, in influenza, 263
FLEMING, A., and CLEMENGER, F. J., a simple method of recording automatically the gas produced by bacteria in culture and the oxygen absorbed by aërobic non-gas-forming bacteria, 66

Gas produced by bacteria in culture, simple method of recording automatically, 66
Glandular adipose tissue, its relation to other endocrine organs and to the vitamine problem, 184
Glycogenic infiltration of the liver of laboratory rabbits, 310
Gold test, value and mechanism of the colloidal, 71
GYE, W. E., see *Russell, B. R. G.*

Hæmolysed blood, toxicity of, 1
HARRIS, D. T., the value of the vital-red method as a clinical means for the estimation of the volume of the blood, 142
Heat-stroke, hyperpyrexial, sympathetic fever and, 31
Histamine, production of shock by, 103
Hyperpyrexial heat-stroke, sympathetic fever and, 31

"Ice-box" method, testing for the Wassermann reaction with the, 219
Influenza, ætiology of, 119, 159, 263
——— bacillus, new medium for the growth of, 129
——— experiments in search of a filter-passing virus in, 263

KENNAWAY, E. L., a method for the estimation of urea by soy-bean, 135

Lethargic encephalitis, see *Encephalitis lethargica*.
Litmus solution suitable for bacteriological purposes, 70
Liver of laboratory rabbits, glycogenic infiltration of, 310

MCINTOSH, J., a litmus solution suitable for bacteriological purposes, 70
——— transmission of experimental *encephalitis lethargica* in series in monkeys and rabbits, with notes on a spontaneous infection in a monkey, 257
——— and SMART, W. A. M., the determination of the reaction of bacteriological culture media, 9
——— and TURNBULL, H. M., the experimental transmission of *encephalitis lethargica* to a monkey, 89
——— see *Fildes, P.*
MACKIE, T. J., variation in agglutinability of bacteria associated with variation of cultural characters, 213
——— and ROWLAND, C. C., the value of simultaneous testing for the Wassermann reaction with two different antigens and the "ice-box" method, 219
MACLEAN, H., and WESSELOW, O. L. V. DE, on the testing of renal efficiency, with observations on the "urea coefficient," 53
MAITLAND, H. B., COWAN, MARY L., and DETWEILER, H. K., the ætiology of epidemic influenza: experiments in search of a filter-passing virus, 263
Malignant cells, see *Cancerous*.
Media, culture, determination of the reaction of, 9
——— ——— influence of the reaction of, on the metabolism of bacteria, 288
Medium, a new, for the growth of *B. influenzæ*, 129
Meningococci, serological classification of, 44
MENTEN, M. L., variations in the benzidine peroxidase reaction depending on fixative, physiological activity and type of animal, 225
Metabolism of bacteria, influence of the reaction of media and of the presence of buffer salts on, 288
Methylene-blue, comparative oxygen avidity of normal and malignant cells measured by their reducing powers on, 115
Micro-organisms, mycelial and other, associated with human actinomycosis, 197
Monkey, experimental transmission of *Encephalitis lethargica* to a, 89, 257
——— spontaneous infection of, with *Encephalitis lethargica*, 257
Mouse tissues, oxygen consumption of normal and cancerous, *in vitro*, 175
——— respiratory exchange of surviving, normal and neoplastic, 244
Mycelial and other micro-organisms associated with human actinomycosis, 197

Neoplastic, see *Cancerous*.

Oxygen absorbed by aërobic non-gas-forming bacteria, simple method of recording automatically, 66
—— avidity, comparative, of normal and malignant cells measured by their reducing powers on methylene-blue, 115
—— consumption of normal and cancerous mouse tissues *in vitro*, 175

Peroxidase reaction, variations in the benzidine, 225
PERRY, H. M., the antigenic properties of *B. psittacosis*, 131
Psittacosis bacillus, antigenic properties of, 131

Rabbits, laboratory, glycogenic infiltration of the liver of, 310
—— transmission of experimental *encephalitis lethargica* in series in, 257
Reaction, of the blood, effect of surgical anæsthesia on, 282
—— of bacteriological culture media, determination of, 9
—— of media, influence of, on the metabolism of bacteria, 288
Renal efficiency, testing of, 53
Respiratory exchange of surviving mouse tissues, 244
ROWLAND, C. C., see *Mackie, T. J.*
RUSSELL, B. R. G., and GYE, W. E., the oxygen consumption of normal and cancerous mouse tissues *in vitro*, 175
—— and WOGLOM, W. H., the respiratory exchange of surviving mouse tissues, normal and neoplastic, 244

Serological classification of meningococci, 44
Shock, production of, by histamine, 103
SMART, W. A. M., see *McIntosh, J.*
Soy-bean, method for the estimation of urea by, 135
Surgical anæsthesia, effect of, on the reaction of the blood, 282
Sympathetic fever and hyperpyrexial heat-stroke, 31

TURNBULL, H. M., glycogenic infiltration of the liver of laboratory rabbits, 310
—— see *McIntosh, J.*
TWORT, F. W., researches on dysentery, 237

"Urea co-efficient," testing of renal efficiency, with observations on the, 53
Urea, a method for the estimation of, by soy-bean, 135

Vital-red method, value of, as a clinical means for the estimation of the volume of the blood, 142
Vitamine problem, glandular adipose tissue and its relation to other endocrine organs and to the, 184
Volume of the blood, value of the vital-red method as a clinical means for the estimation of, 142

Wassermann reaction, value of the "ice-box" method, 219
—— value of simultaneous testing for, with two different antigens, 219
WESSELOW, O. L. V. DE, see *MacLean, H.*
WOGLOM, W. H., see *Russell, B. R. G.*
WOLF, C. G. L., the influence of the reaction of media and of the presence of buffer salts on the metabolism of bacteria, 288
